

Johns Hopkins All Children's Hospital

Johns Hopkins All Children's Hospital in St. Petersburg, Florida, is a leader in children's health care, combining a legacy of compassionate care focused solely on children since 1926 with the innovation and experience of one of the world's leading health care systems.

The 259-bed teaching hospital, ranked in multiple pediatric specialties by *U.S. News & World Report*, stands at the forefront of discovery, leading innovative research to cure and prevent childhood diseases while training the next generation of pediatric experts. With a network of Johns Hopkins All Children's Outpatient Care centers and collaborative care provided by our specialty physicians at regional hospitals, the hospital brings care closer to home.

Johns Hopkins All Children's Hospital consistently keeps the patient and family at the center of care while continuing to expand its mission in treatment, research, education and advocacy.

Nationally and Internationally Recognized Care

Johns Hopkins All Children's Hospital treats patients from throughout Florida and the southeastern United States, and from the Caribbean, Latin and Central America, and the Middle East. The Johns Hopkins All Children's International Program includes bilingual international coordinators who facilitate culturally sensitive patient- and family-centered care.

Johns Hopkins All Children's received Magnet designation from the American Nurses Credentialing Center in 2019. Magnet recognition is the highest and most prestigious credential a health care organization can receive for nursing excellence and high-quality patient outcomes.

FY2022 Statistics

- 6,200+ inpatient admissions
- 7,300+ surgeries
- 48,000+ emergency center visits
- 312,000+ outpatient visits
- 3,350+ employees
- 369+ physicians

Johns Hopkins All Children's Hospital's specialty services include the following:

Cancer & Blood Disorders Institute

- One of the largest pediatric cancer centers in the southeastern United States, the oncology program is an active member of the Children's Oncology Group and provides access to phase I studies.
- We are proud to be the first certified pediatric treatment center in Florida offering chimeric antigen receptor (CAR) T-cell immunotherapy.
- Our pediatric thrombosis program helps children with blood clots and clotting disorders, and provides access to clinical trials.

Heart Institute

- We offer evaluation and treatment for patients with congenital heart defects, cardiomyopathy, heart failure, hypertension, arrhythmias and other heart problems.
- The cardiac surgery program offers a range of procedures, including transplantation.
- Our program is a nationally designated Cardiomyopathy Center of Care.

Institute for Brain Protection Sciences

- Our neurosurgery team treats patients with brain tumors, seizure disorders and other problems of the head and spine, offering keyhole and robotic-assisted neurosurgical procedures.
- The institute offers comprehensive subspecialty care, including neurology, epileptology, stroke, neuro-oncology, neuroradiology, developmental medicine, and physical and rehabilitative medicine.
- The Center for Behavioral Health addresses the growing needs of young people, particularly with mental development issues, cognitive disorders and bullying.

Maternal, Fetal & Neonatal Institute

- We provide expert care for high-risk expectant mothers, continuing through delivery and neonatal intensive care unit admission, and extending beyond discharge through neonatal follow-up clinics.
- We have 900 -plus admissions annually — including more than 100 very and extremely low birth weight infants — to our 97-bed American Academy of Pediatrics level IV-rated neonatal intensive care unit.
- Our experts perform prenatal diagnoses of congenital heart defects and other congenital anomalies.

Pediatric Surgery

- The Center for Congenital Diaphragmatic Hernia is the only unit in the nation with 24/7 care exclusively for CDH and achieves a more than 90% success rate.
- Our surgical specialties include pediatric, orthopaedic and scoliosis surgery, plastic and reconstructive surgery, and urologic surgery.

Other Specialty Services

- The Cystic Fibrosis Foundation designated Johns Hopkins All Children's as a national CF Center and CF Therapeutics Development Center, specializing in clinical trials to evaluate promising new therapies.
- The LifeLine critical care transport team brings patients to Johns Hopkins All Children's Hospital for care using lifesaving technology, including ECMO, nitric oxide and heliox therapy.
